A solution for Financial Needs of Gig Workers in India

- The gig economy in India has seen exponential growth over the past decade, providing flexible employment opportunities across various sectors, including food delivery, ride-hailing, and freelance services.
- However, gig workers face unique financial challenges that can hinder their economic stability and overall well-being.

Aryan, 41 years
Dharwad, Karnataka
Carpenter

Background

Aryan is doing carpentry since 15 years. His income depends upon the no. of gigs received in that month. Aryan has minimal knowledge of financial management tools and concepts, and often faces payment delays from clients

Pain Points

Income variability, Difficulty Tracking Payments, Limited Financial Knowledge, Irregular Expenses, Inconsistent Expense Tracking, Delayed Payments

Needs

Income and expense tracking, Budgeting, Financial literacy & awareness of existing schemes

Dasgupta, 35 years
Hyderabad
Zomato Delivery Boy

Background

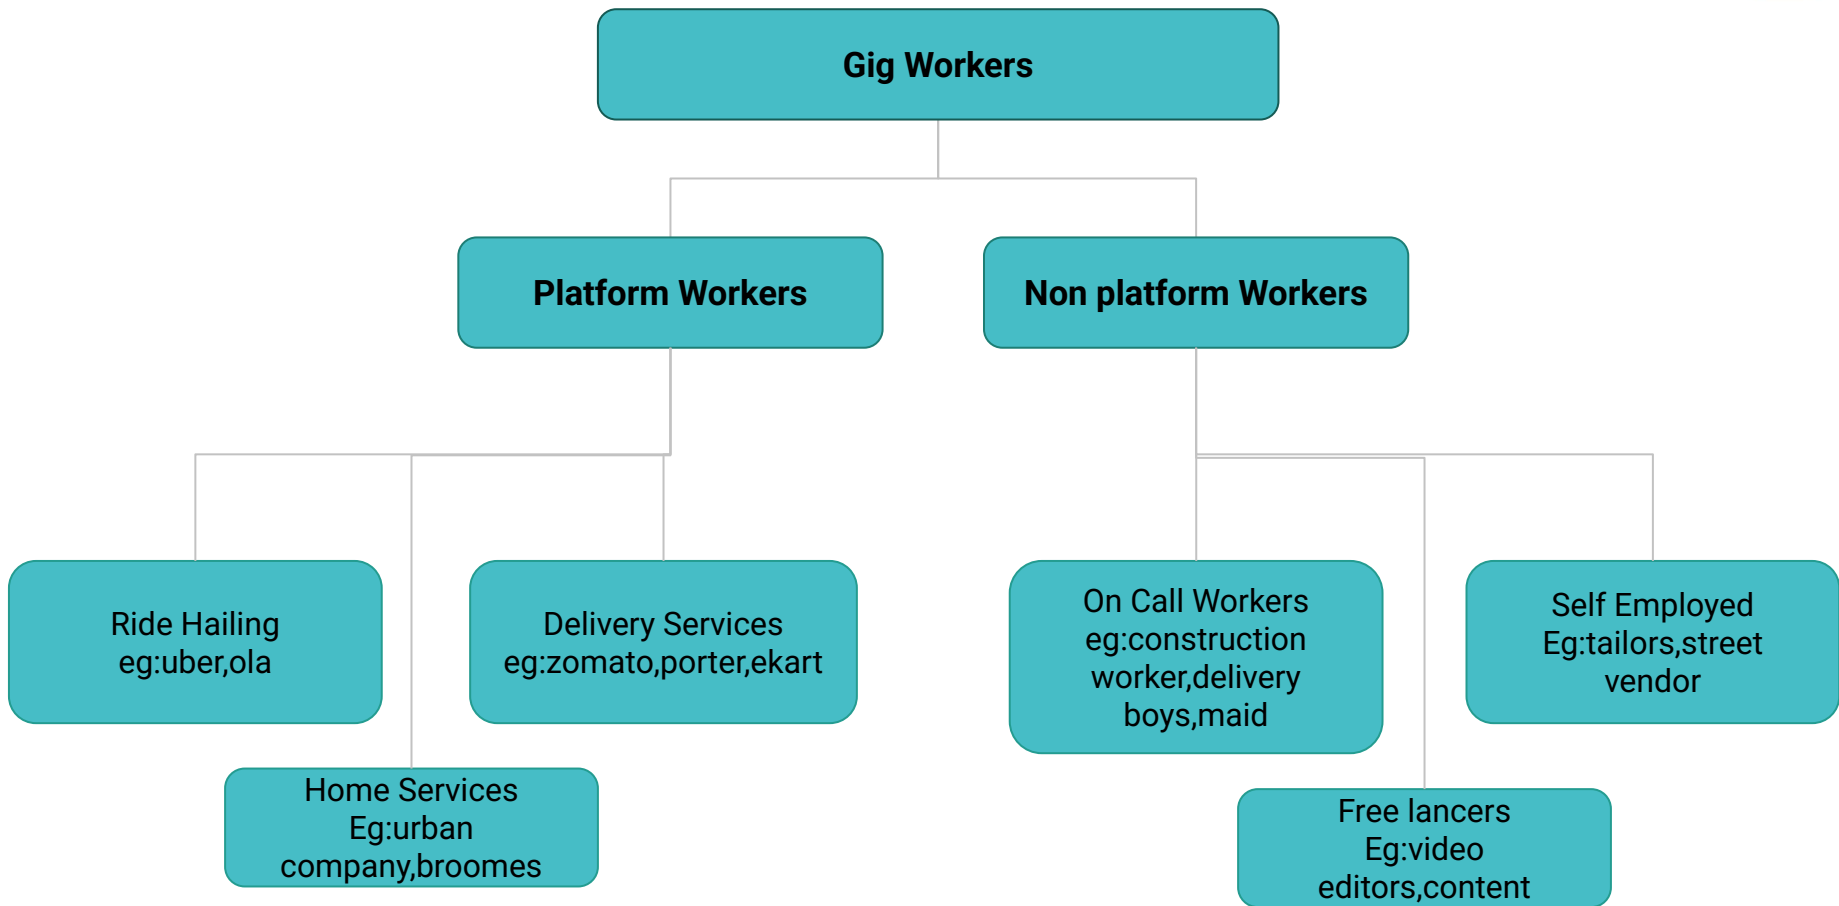

Dasgupta has been a delivery partner for Zomato & Swiggy for 3 years, relying on tips and incentives to supplement his base pay. His income is unpredictable, with no guaranteed deliveries. He prepares for competitive tests during night and doesn't track his income & expenses

Pain points

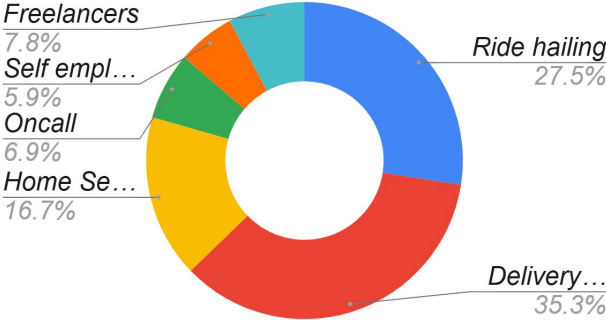

Inconsistent deliveries, no time to track income and expenses of fuel, no job security, unaware of govt benefits

Needs

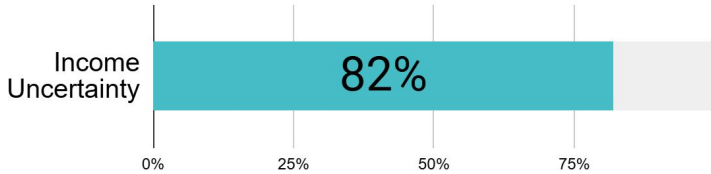

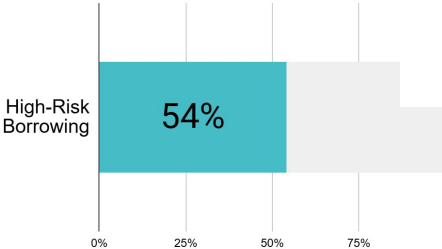

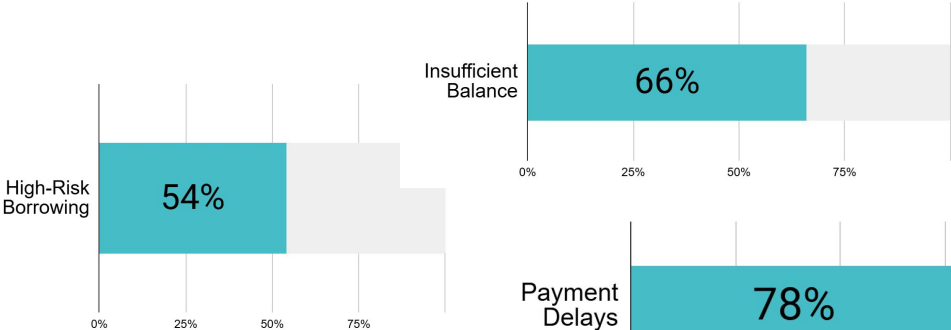

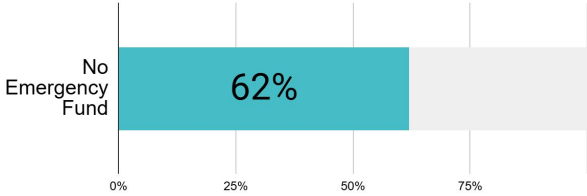

Auto tracking of income, track expenses, know schemes & benefits applicable

Poll Taken over 20+

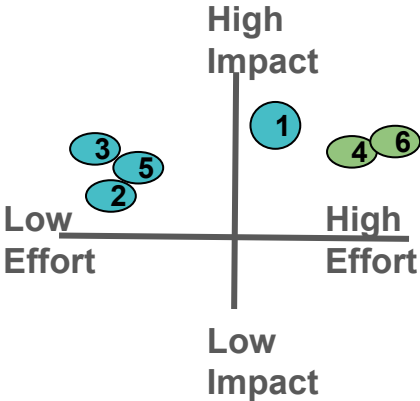

Conducted one-on-one interviews with a diverse group of gig workers (e.g., delivery personnel, freelancers, ride-hailing drivers) and gathered detailed insights into their experiences and challenges.

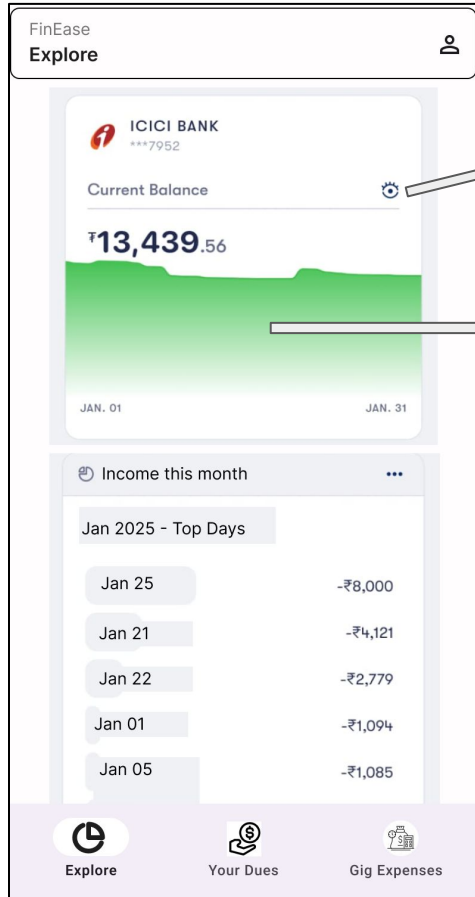

Sr. no	Root Cause	Solution	Implementation	Priority Ranking
1	Fluctuating Income	Savings & expenses math	Integration with simple financial tools	1
2	Delayed Payments	Reminders for payments	Simple automation via notifications	3
3	Job Insecurity	Have insurance policies	Integration with insurance policies	2
4	Fewer Access to Credit	Check income sources, background loans	Needs credit assessment integration	
5	Lack of Financial Literacy	Simple UI/UX at an understandable level	Simple Design practices	★
6	Lack of Financial Security	Emergency fund recommendations based on income & expenses	Needs more data Analysis & tracking for accuracy	

Touch points: User clicks on the app, unlocks using PIN or biometric to visit the home page

Touch points: User clicks on Schemes and benefits on profile page

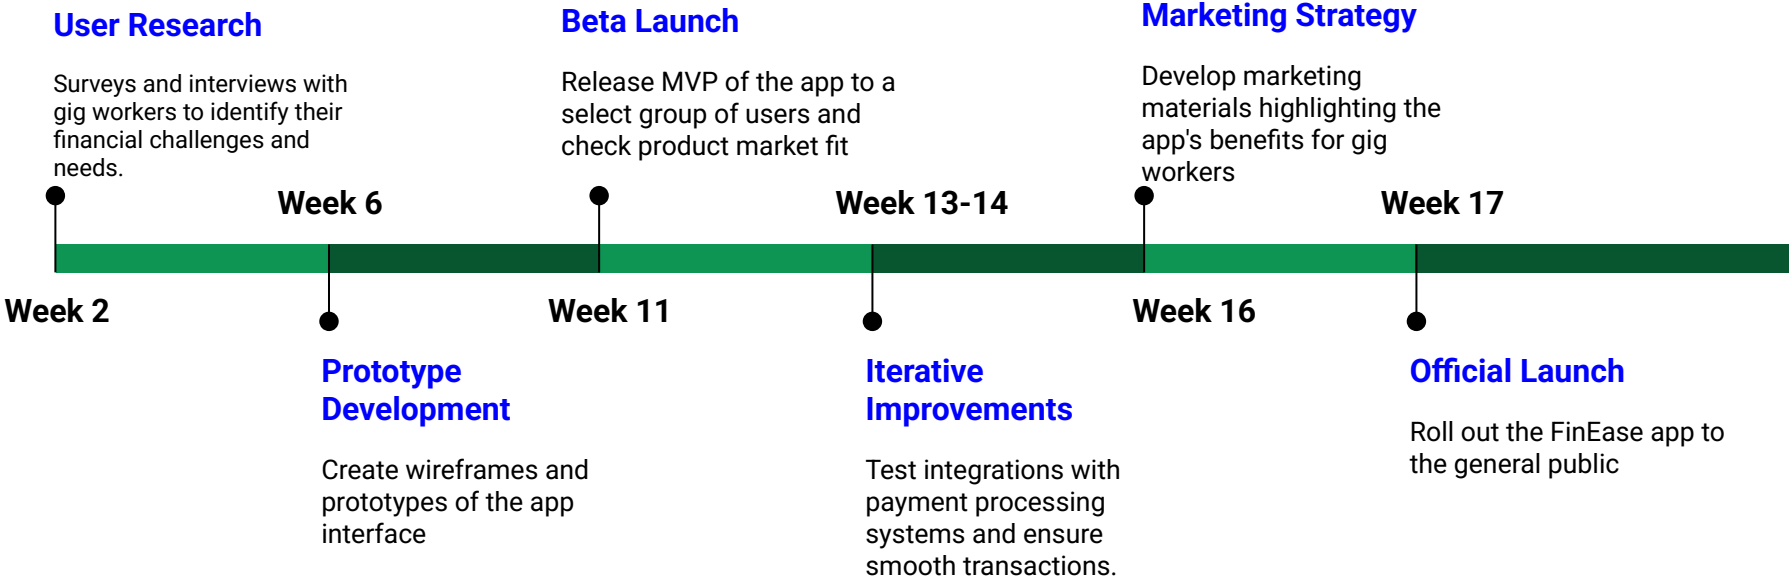

Touch points: User clicks Insurance & loans on profile page

User can view all news and schemes related gig workers -can be done using web scrapping

Partner with insurance & loan providers for gig workers which helps in generating revenue from acquired user base

01	Awareness Stage	• Percentage of gig workers aware of the FinEase app. - Achieve a brand awareness level of at least 60% among gig workers in target cities within the first six months of launch
02	Acquisition Stage	• No. of users who download and register on the app - Aim for a registration completion rate of at least 70%.
03	Activation Stage	• Feature Engagement Rate - Percentage of users actively using key features (budgeting tools, income tracker) within the first month.
04	Retention Stage	• Number of unique users engaging with the app at least once a month. - Keep churn rate below 20% after three months
05	Revenue Stage	• Total revenue generated from partnerships with financial institutions and fintech companies - Achieve a partnership revenue of ₹10 million within the first year through strategic collaborations.
06	Impact Stage	• Users reporting improved financial stability (e.g., savings growth, reduced debt) - Target at least 60% of active users reporting improved financial management within one year

User Acquisition

- Leverage social media platforms (Facebook, Instagram) popular among gig workers.
- Form alliances with companies like Uber, Zomato, and Swiggy for cross-promotional opportunities
- Implement a referral program that incentivizes existing users to invite new users.

User Retention

- Provide a seamless onboarding process that highlights key features and benefits tailored for gig workers.
- Continuously enhance app features based on user feedback

Monetization Strategies

- Generate income through collaborations with financial institutions for microloans and other financial products
- Allow targeted advertising from relevant brands and services within the app, ensuring ads are useful to users.

User Base Development
